Summary

Full stack web developer, leveraging business operations management background to enhance customer-satisfaction and process efficiency. Certified by Vanderbilt University in full stack web technologies, including, but not limited to, JavaScript, Node.js, React and HTML. I am fascinated by viewing the challenges of a business through the lens of a developer and using cutting-edge web technologies to identify strategies, drive growth, capture the customer's attention and maintain a competitive advantage. My past experience and technical aptitude, combined with adept problem-solving abilities and determination, make me a strong addition to any team.

Experience

Business Operations Manager

TV Prop Masters LLC

Jun 2018 - Present (2 years 9 months +)

TV Prop Masters LLC partners with vendors who are seeking prop design, transportation and setup, as well as product testing, creation of demonstrations and building displays for TV sales. As business operations manager, I built and maintain the client database, am responsible for researching and purchasing all software for the business, handle all marketing and customer relations, and oversee all financial information including the creation of the budget, invoices and reports.

Manufacturers Sales Representative

Jan 2016 - May 2018 (2 years 5 months)

Being a manufacturer representative at Jumpstart Productions was my first introduction into the world of sales and working in a professional environment with larger corporations. My job was to assist our vendors such as Progressive Kitchenware, Dash Mobility and Dyson through the process of selling their products through the Home Shopping Network. This consists of setting up meetings with HSN buyers, securing an on-air guest, creating demonstrations and providing show support and recaps.

Education

Vanderbilt University

Certificate, Full Stack Web Development

Jun 2020 - Jan 2021

Took on a rigorous curriculum that covers a full-stack: HTML5, CSS3, JavaScript, jQuery, Bootstrap, Express.js, React.js, Node.js, Database Theory, MongoDB, MySQL, Command Line, Git, and more. Simulated a professional work environment by teaming up with peers on real-world projects and built complex applications.

Purdue University Global

Pursuing B.S., Information Technology

2019 - 2022

My pursuit for a BS in Information Technology with a concentration in programming and software development has provided me with an in-depth understanding of software development practices, by studying a wide variety of platforms, including web, mobile, and traditional applications. Through these courses, I have gained invaluable skills in Leadership and communication, Problem solving and critical thinking, Personal presentation, and a better understanding of the concepts of multiculturalism and diversity.

Ivy Tech Community College

Computer Science

2015 - 2016
